Topcon TMR Tracker

Feed Management Technology
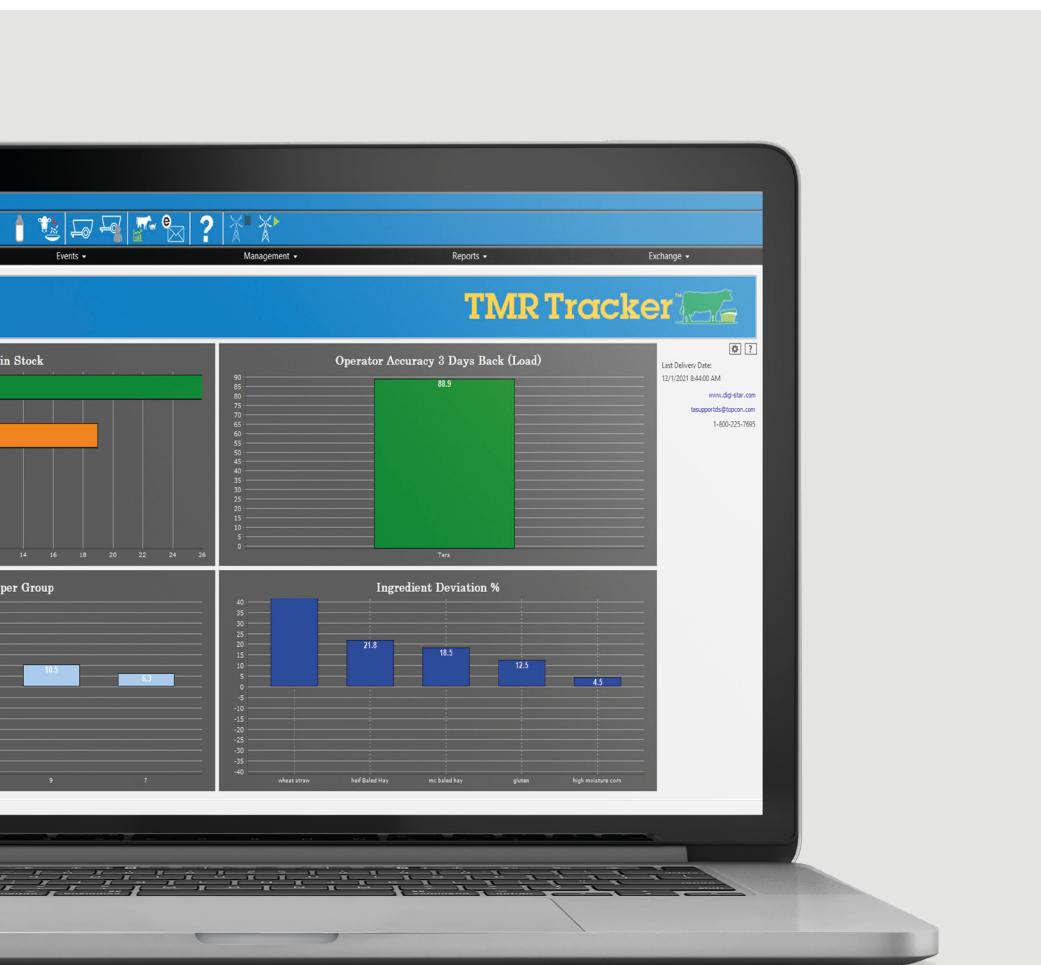

Increase production through
consistent feeding

Learn more at **topconpositioning.com**

The Ration Created. The Ration Fed. The Ration They Ate.

TMR Tracker is the most advanced, easy-to-use feed management system available.

Farm Management Control

- Easily monitor and customize the feeding process from start to finish
- Collect your valuable feeding data and analyze it for improving protocols
- Assist your management team with business decisions and planning
- Share your feeding data with nutritionists, financial institutions and others

Inventory and Ingredient Tracking

- Help control shrink by analyzing and tracking ingredients
- Move away from time-consuming manual recording
- Accurately enter, edit and manage your ingredients
- Provide the best nutrient profile per ration by keeping Dry Matter per ingredient current

» Works with most herd management programs to import head counts and milk weights

» Increased production through consistent feeding

» Consultant version available to share feeding data and create custom reports

» Employee and mixer management tools

» Capable of truck scale integration

TOPCON

TMR Tracker™ System

Optional: Cab Control in loader tractor uses internal radio to repeat TMR 3610.

Required: Digi-Star scalehead on TMR Mixer. TMR 3610 is a common option and can have an internal radio to communicate to loader or send/receive data with office PC.

Optional: Touchscreen 7600 connects to scalehead on TMR mixer to give advanced feature capabilities.

Optional: Use a roof-mounted radio base station kit or on-farm Wi-Fi access for easy transfer of data.

Required: TMR Tracker software on a computer in office to create and manage feeding.
Optional: RF DataLink Software to manage sending or receiving loads for wireless communication.

Move your data from the feed mixer indicator to your PC and back.

Transfer data options include:
- USB Drives
- Wireless (radio communication)
- Wi-Fi

Operator Control

- Empower your team by providing ease of use and accuracy
- Make changes easily in the PC software or hardware
- Easily manage pen and ration changes
- Multiple operator control options
- Prevent over mixing
