## TAP FEED Software

TAP FEED is tied directly to the feed mixer to improve workflow efficiency, the software provides clear, powerful functionality to manage livestock's greatest operating cost.

With subscription options to suit every operation, dairy farmers can easily manage products, feeding groups, feed lists, load mixers, feeding periods, operators, and more.

Efficiently create and export comprehensive reports, including ingredients usage, loads, DM intake per head, ration delivery, group delivery and operator accuracy.

Permit access and share with trusted advisors too. Feed management has never been easier, more connected or cost-effective.

# Digital Feed Management

## Software for Advisors

To this day, many livestock farmers manually report feeding results to their advisors, impacting data accuracy and support efficiency. TAP FEED Advisor coupled with TAP FEED Lite and Pro subscriptions streamlines the workflow through a connected feed management ecosystem. Tied directly to the mixer via mobile application, the solution collects exact feeding data and automatically uploads for analysis, even enabling real-time support. It allows advisors and feed companies the data quality necessary for relevant insights and the efficiency to provide impactful recommendations.

Remotely monitor activities, create reports, analyze use, and provide valuable insights for improved customer profitability, all in real-time. Easily align and connect your business including a "sub-advisors" framework to support lasting customer relations.

For Work That Matters™

## Fine-tune performance

### TMR Flex Pro Smart Feeding Technology

Feeding represents 50-60% of operational cost on the dairy or beef farm. Besides accuracy, elements such as flexibility and time are critical to this, in particular on the larger farms. The modular TMR Flex Pro system has been developed together with farmers to improve the daily workflow – on-the-go – in a more practical and convenient way. A self-explanatory interface for simplified operations reduces the learning curve and ensures ease of use for individual operators and feeding teams. The system allows multiple users to collaborate seamlessly during the loading and delivery process, enhancing visibility, efficiency, and productivity. Ingredient tracking functionality enhances inventory control, and the system's unique refusal recording and substitution feature reduces feed waste, improving sustainability and farmers' return on investment.

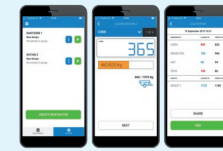

The system is comprised of the Digi-Star FD1 tablet, a data transfer device, and the TAP FEED Pro/Feedlot subscription. It is designed to maximize efficiency in feed management, allowing producers to reduce costs and optimize resource utilization. The system offers enhanced data visibility and monitoring capabilities, providing farmers with valuable, data-driven insights for better planning and decision-making.

TMR Flex Pro can be connected to existing Digi-Star scale systems or load cells of any kind on any brand feed mixer. It is the best-in-class upgrade solution to achieve a next-level feed management experience on any type or size dairy and feedlot operation. The TAP FEED cloud platform allows producers to collaborate with their trusted partners.

## Reduce costs

### Digi-Star 2810 Bluetooth - Value Line

Compatible with virtually any TMR mixer on the market, the Digi-Star 2810 BT Indicator offers remote connectivity. Additionally, for increased monitoring capability, the solution comes standard with a free mobile application FEED app for IOS and Android and is designed for organic user-progression, offering basic data logging today with the option to connect to advanced feed management software via Topcon Agriculture Platform (TAP FEED).

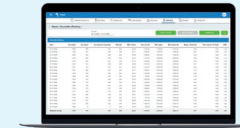

### FEED App

- Any livestock operation
- Workflow integrated into feed mixer (Requires Topcon/Digi-Star display or convertor)
- Connected to TAP FEED Lite/Pro/Feedlot
- Basic reports
- Loads and recipes
- Feeding groups
- Download app for free

### TAP FEED Lite

- Any livestock operation
- Workflow integrated into feed mixer (Requires Topcon/Digi-Star display or convertor)
- Connected to FEED App
- Core feed management capability
- Exportable reports

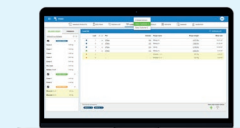

### TAP FEED Pro

- Dairy operations
- All TAP FEED Lite features
- Plus advanced dairy features
- Dry matter efficiency reporting
- Supports different recipe types
- Zone control
- Extended report formats

### TAP FEED Feedlot

- Any feedlot operation
- Workflow integrated into feed mixer
- Connected to any Digi-Star feeding hardware and feed app
- Core feedlot management capability
- Lot closeout report
- Track feed or other costs by lot or by owner

### TAP FEED Advisor

Designed to optimize the feed management workflow between consultants, advisors and farmers.

#### Third Party Link

Connect any TAP FEED subscription to third party feed management software and technology

#### Advanced Inventory Manager

Tools to manage and track feed inventory.
